Danish Refugee Council (DRC)

Damascus, Syria

Re: Information Technology Assistant

Dear Hiring Manager,

I am writing to apply for the Information Technology Assistant position at the Danish Refugee Council (DRC) in Damascus, Syria. With over a decade of experience in designing, implementing, and maintaining complex IT systems across government, enterprise, and humanitarian contexts, I am confident in my ability to support DRC's IT operations and contribute to its vital mission in Syria.

In my current role as **Deputy Head of Technical Affairs** at Takamol Company, I manage critical enterprise information systems for the Ministry of Oil, overseeing system stability, user support, and data integrity. I troubleshoot technical issues, coordinate with developers to resolve bugs, and maintain direct communication with end-users — skills that directly translate to providing reliable IT support to DRC staff and field operations.

As **Data Migration Engineer** at SaudiEX, I designed and executed automated ETL pipelines using Python and Selenium, extracting structured data from legacy systems and ensuring data accuracy through rigorous validation. This experience has strengthened my ability to work with databases, write SQL queries for reporting and reconciliation, and maintain data quality — all essential for an IT support role in a humanitarian organization.

Previously, as a **Full-Stack Software Engineer** at HIAST, I built and maintained multiple government information systems, including fleet tracking platforms, census data systems, and laboratory management systems. I managed the full lifecycle of these systems — from requirements gathering and development to deployment, user training, and ongoing maintenance. I also have extensive experience with database administration (PostgreSQL, Oracle, SQL Server), system integration, and troubleshooting hardware and software issues.

I hold an **MSc in Big Data Systems** from HIAST, where my research explored blockchain-based governance models for public services. I am fluent in English and Arabic, based in Damascus, and available for immediate employment.

I am deeply committed to supporting humanitarian work and am excited about the opportunity to apply my technical expertise to help DRC deliver its programs effectively in Syria. I look forward to contributing to your team and ensuring that DRC's IT infrastructure remains reliable, secure, and responsive to the needs of your staff and beneficiaries.

Yours sincerely,

Mouhannad Allouf
